Google for Education

Getting started with
Google Apps for Education

I'm interested in getting Google Apps for Education. Generally the Tech Director or Admin will take the lead on setting up this account because when we enroll it's for the whole school, not just for one teacher. Plus, sign up requires access to our web domain. You can sign up directly or get assistance if you have any questions here: **http://www.google.com/edu**

Below are some major benefits. Specifically for you:
- Free for schools
- 24/7 support at no additional cost
- No advertisements
- 99.9% uptime guaranteed
- Apps work on any computer, tablet or phone

Here are more details about apps and their benefits:
http://www.google.com/edu/products/productivity-tools

Here's a step-by-step Education IT guide:
http://www.google.com/edu/it

You'll also find case studies of other schools deploying and using devices at their school here:
http://www.google.com/edu/case-studies

Thanks!
